

Target Fund PCA 2025

As of 6/30/10

Investment Objective:

To provide the highest level of long term return consistent with an emphasis on capital appreciation and income generation.

Investment Strategy:

Invests in a diversified combination of mutual and separately managed funds using an asset allocation strategy uniquely designed for investors expecting to retire around the year 2025. This fund will gradually become more conservative as the target date approaches.

Investment Risk:

While an asset allocation strategy can be a good tool to reduce portfolio volatility, all investments are subject to risk. This includes the PCA Target Retirement Funds. PCA 2025 – PCA 2025 hold most of the underlying assets in equities and therefore have the potential to earn a high rate of return. However, these funds are sometimes subject to prolonged periods of significant share price fluctuations. Those who are unwilling to accept price volatility should invest in a more conservative allocation with a corresponding lower expected return.

Target Fund Description:

Target Retirement Funds are designed to provide the maximum level of investment assistance for participants who have little interest, time or experience investing in the financial markets. Over the last several years, many investors have been attracted to the ease and simplicity offered through these funds.

The beauty of Target Retirement Funds is that on-going investment decisions are turned over to an experienced portfolio management team. Its goal is to create a portfolio that is properly diversified and adequately reflects the risk for an investor's current stage of life. Initially the team will carefully design a Target Retirement Fund to be more aggressive. Over time the fund will gradually become more conservative as investors approach their retirement date and beyond.

PCA Retirement & Benefits, Inc. (RBI) has designed twelve Target Retirement Funds that will assist our ministry partners by eliminating the guesswork and reducing the responsibilities of maintaining a proper portfolio mix. The professionals at RBI regularly monitor and adjust each Target Retirement Fund to provide investors with greater stability and reduced risk. To select the correct Target Fund for you, simply pick the fund closest to your retirement year, and then let the experts at RBI do the rest.

- Past performance does not guarantee future results. Due to enduring market volatility, a fund's current performance may be more or less than the result shown above.
